

Remote Monitoring of Sensors In Hazardous Areas

- User friendly, proven and flexible.
- Compatible with thousands of sensors.
- View your data in the cloud & get alerts.
- Remotely configurable.
- One system to thousands

Metron telemetry hardware makes remote monitoring simple and affordable, interfacing with sensors, taking periodic readings & transmitting them over mobile phone networks to our flexible, secure MetronView cloud.

End to end IIoT solutions proven to deliver competitive advantages

- 4 inputs as standard (4-20mA, 0-10 volt, ON/OFF via volt free contact).
- 4G (LTE-M & NB1) & 2G connectivity.
- Self-contained weatherproof device.
- Battery-powered (rechargeable 12.8V 15AH). Other power options on request.
- Remotely programmable (data intervals, scaling, units, tag names, thresholds & lots more).
- Compatible with 1000's of sensors.
- Easy to retrofit.
- Enclosure 312 x 388 x 221 mm. Approx 10Kg's. Powder coated, marine grade copper free aluminium alloy.
